Power cord length	8 meter	Microfiber cloth	1
Main unit dimensions	30x36x26 cm	Ultra-microfiber steam pads rectangular	1
Main unit weight	7,5 Kgs	Ultra-microfiber steam pads triangular	1
		Descaling kit	1
		Harness	1
		Manual	1

Depliant IMEX-SC05

IMEX-SC05 steam cleaner is versatile and professional, it can be used as a normal canister cleaner or as a backpack with professional harness to wear a backpack in the safely and comfortably go to steam clean and sanitize even the tightest spaces. A magnet attached to the harness allows the operator to hook the steam hose to the harness thus to have both hands free when needed.

The machine is equipped with automatic refilling system, also know as "continuous steam", and detergent injection function. The continuous steam system allows the operator to use the machine continuously, in fact, the water can be refilled instantly, at any time, without switch OFF or to wait until the machine cools down.
A buzzer and a red light alerts the operator when the water in the tank ends.

The backpack steam cleaner is ideal for the following types of applications: scale, public toilets, cleaning windows, underground areas, homes, small shops, boats, interior and exterior of airplanes, buses, trucks, trains, industrial machinery any application that requires a steam cleaner to clean in tight and hard to reach places.

The buttons on the detergent and steam are placed directly on the handle, which ensures the user a full and direct control of machine functions

The injection of the detergent is also very useful when there is a need to spray any soap disinfectant together with steam and help the user to reach the maximum cleaning performance. Thanks to the ON/OFF switch button on the handle it is possible to control the amount of detergent and / or disinfectant to be sprayed on the surface to be treated.

The backpack has been designed to cover all the needs in steam cleaning, thanks to the feedback with our customers have been taken all necessary measures to give the machine the best practicality without compromising performance.

The machine is equipped with a connector for attaching and detaching the steam hose.

A robust range of accessories developed specifically for professional help cleaning in every situation.

STEAM CAR WASH

The backpack is also good for steam car wash in garages, private parking, workshops and generally in any places where it is not possible to have water source or to leave the ground wet and dirty. For this application we strongly recommend the use of SWS biodegradable detergent which helps to smooth the steam cleaning process and at the same time leaving a very slick & glossy finish that is mar-free.

The procedure is very simple, dilute the SWS detergent in water with 6%-10% concentration (1 liter water = 60-100ml SWS). Pour the solution into detergent tank. Spray the solution on a quarter side of the car evenly then go over with steam only and microfiber cloth to remove the dirt. The car will shine for weeks!!
