

IMEX-SVC09 CW

Technical Details	
Input power	230V – 50 Hz
Housing material	Stainless steel
Boiler capacity	3 Liters
Boiler power	3500 W
Max steam pressure	8 Bar (116 Psi)
Refilling water tank capacity	5 Liters
Chemical tank capacity	5 Liters
Motor power	1300 W
Dirt recovery capacity	7 Liters
Suction capacity	215 m³/hour
Heating time	8 minutes
Max steam temperature	176° C
Main unit Dimension	45x78x101H cm
Weight	40 Kg

**IMEX-SVC09CW
STANDARD
ACCESSORIES**

Steam car wash helps to save water.

The average water consumption of our steam equipment is 0,1 Liter per Minute whereas a common Small-medium high pressure washer consumes approximately 6-7 Liter per Minutes.

IMEX-SVC09CW is our recommended steam and vacuum system for car wash and other industrial applications.

Compared to other industrial electrical steam and vacuum:

Advantages

- more steam output capacity.
- more steady operating pressure.
- quicker temperature and pressure recovery.
- strong built unit with more steady vacuum system attachment on the back which allows more easy and safety carry.
- 3 flexible hoses (including extensible vacuum hose)

6mt steam hose with gun with special design metal end steam nozzle and rubber cover.

4,5mt steam and vacuum hose.

1mt extensible up to 5mt wet and dry vacuum hose.

- Detergent is injected when needed by simply pushing the red button on the gun.
- Hydrojet hot water function.
- Built in refilling tanks with easy to fill inlet from the top.
- Light weight, only 40 Kgs, allows single person to carry easily.

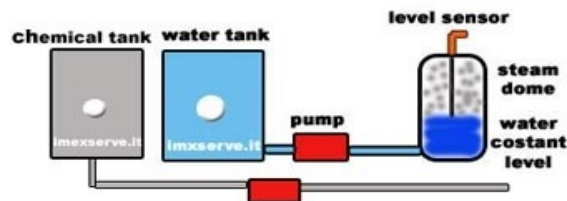

With the first supply IMEX includes in the shipment also the steam only kit (page: 5/5).

For exterior steam car wash we recommend to spray our biodegradable solution (IMEX-SWS) together with steam on a half side of the car body and next step to go over with steam and microfiber cloth.

The suggestion to use a solution is because steam is made of water and unless the water is completely softened or purified it can not clean up by itself. Another reason is that our biodegradable solution based on polymers helps to lubricate the surface before going over with dry steam and at the same time it leaves a protective and shining finishing.

CONTINUOUS STEAM SYSTEM + CHEMICAL INJECTON

For very dirty car it is recommended to spray suitable solution with steam and hydrojet water function.
For big size vehicles and trucks we recommend the use of our Nebulizer/Sprayers.
You can see the Sprayers at: <http://www.imexserve.it/nebulizer-foamer.html>

All our steam car wash equipment are provided with the so-called continuous steam system. It consists of a separated cold water tank that automatically fills the necessary amount of water to keep a constant water level into the boiler. In this way it never happens that the boiler remains without water, and when the water ends up in the cold tank the operator can refill immediately without any waste of time.

Standard Accessories:

 <p>Steam and vacuum extension hose</p>	 <p>Large window cleaner</p>
 <p>Small nylon brush</p>	 <p>Special car mats steam Cleaning tool with brass steam nozzle</p>
 <p>Vacuum cleaner only extension hose</p>	 <p>Small window cleaner</p>
 <p>Car seats vacuum nozzle</p>	 <p>Crevice tool</p>
 <p>Steam lance with small nozzle</p>	 <p>Steam and vacuum hose</p>
 <p>Steam only hose with professional pistol (6 meter length)</p>	 <p>Extensible vacuum only hose (1 meter extensible up to 4 meter) Ideal for car interior vacuum cleaning</p>

Optional Stean only kit of Accessories:

 <p>Flexible hose</p>	 <p>Joint elbow for recta and triang brushes</p>
 <p>Steam nozzle</p>	 <p>Round nylon bristled brush</p>
 <p>Small metal bristled brush</p>	 <p>Small nylon bristled brush</p>
 <p>Extension hoses</p>	 <p>Rectangular brush</p>
 <p>Triangular brush</p>	 <p>Window cleaner</p>
 <p>IMEX-SWD</p> <p>Biodegradable multi-purpose dregreaser (to be used plain or dliiluted in water 6%)</p> <p>0,90 lit.</p>	
 <p>IMEX- MCW01</p> <p>Microfiber cloth 60x50cm</p> <p>10 pcs/package</p>
