

IMEX-BV50 Industrial Cordless Wet and Dry Battery Vacuum Cleaner

Flexibility – Ease operation – Modular Construction – Safety

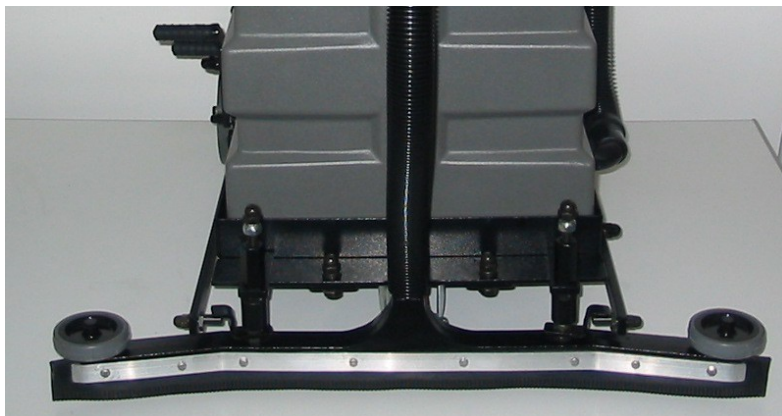

The unit is flexible by allowing quick and easy vacuuming on an immediate need basis without the necessity of a power cable connection.

Each unit comes standard with an on board battery charger (photo 2) that can be plugged in anywhere where a power outlet is available. The strong cast alloy squeegee allows maximum coverage for water suction/removal (photo 1).

The use of large back wheels allows maximum maneuverability to reach any area with a minimum of effort.

A visual indication of battery levels as well as the main switch is easily accessible on the control panel to allow easy access/viewing for the operator. The machine has a protection for the batteries that automatically disconnects them upon reaching a certain charge level.

The unit has two types of batteries

Technical details:

• Voltage	24V/DC
• Vacuum motor	24V/550W
• Batteries	2/12V/75A
• Run-time	3-3.5 hours
• Battery charger	24V/8A on board
• Water lift mm.H ₂ O	1300
• Sound level	65 dbA
• Dry	Yes
• Wet	Yes
• Air flow	32 lt/sec.
• Capacity	50 lt.
• Weight	25 kg.
• Batteries weight	39 kg.
• Frontal squeegee	cm. 75
• Dimensions	cm. 75x85x100 H.
